

Exciting News: CalGrows Training Initiative Extended!

The Arc of San Diego is pleased to share some exciting news with you. The CalGrows Training Initiative, a California Department of Aging (CDA) program designed to support caregivers of older adults and people with disabilities by improving their skills through workforce training, has been extended for Arc direct care workers. This initiative has provided valuable training opportunities, and we are excited to continue supporting your professional growth.

In recognition of your efforts, we are also pleased to inform you that eligible Arc staff will receive payment on June 22, 2024 paycheck for trainings completed from January 2024 through May 2024.

Additionally, we would like to inform you that training incentives will continue to be disbursed for trainings until August 31, 2024 or until all grant funds have been expended, whichever comes first. This is a great opportunity for eligible staff members to continue participating in monthly trainings and enhance their skills.

We would like to express our gratitude for your dedication and hard work. Your commitment to improving your skills and knowledge greatly enriches the quality of care we can provide to those we serve.

Thank you for supporting people with disabilities and being the best caregiver you can be!
